

Website to finished assets

Your source website

Open the fictional *Maker Day* brief. The matching source PDF is included for accounts without browsing.

Choose one finished output

A five-slide PowerPoint opening presentation; a one-page PDF student passport; a two-page Word facilitator guide; or a responsive one-page HTML event website.

Give it the whole job

Use the complete format prompt. Ask for the actual file, useful visuals and a review before it reports completion. A chat response or a plan is not the finished asset.

Open and check the result

Preserve 24 learners, three groups of eight and all three stations. Welcome 5 minutes, rotations 15 minutes each, share 8 minutes and exit 2 minutes: total 60.

Request a real revision

Change the event to 45 minutes: welcome 3, three rotations of 12, share 4, exit 2. Open the revised file and check all affected sections.

Save something useful

Download the finished file and record one checked fact and one revision. If the account cannot create your chosen format, choose one it can export or revise an included example.
